

# AVOMAX LIMITED

## FULL SPRAY MANAGEMENT PROGRAMME

### PARTIES

Avomax Limited

Grower ( \_\_\_\_\_ )

Grower Pin No. ( \_\_\_\_\_ )

### **Pest Monitoring:**

- Grower shall arrange pest monitoring with an accredited Avogreen monitor.
- Monitoring shall be on a fortnightly basis from November through to May.
- Grower shall arrange spot monitor between May and November at Avomax request.
- Monitoring results are sent directly to Avomax's office.

### **Spraying:**

On receipt of monitoring results, Avomax will decide if the orchard requires spraying. If the orchard is to be sprayed Avomax will contact the Grower and discuss the choice of chemicals appropriate for the pest/s present with regard to chemical MRLs for harvest.

Avomax will then apply chemical at an appropriate time of their choosing.

If the Grower requests that the spraying should not take place, the money back guarantee will be void.

In orchards with large trees Avomax may request helicopter applications in addition to ground applications. On the Grower's approval, Avomax will arrange the helicopter applications at a time deemed appropriate by Avomax. If the Grower does not give this approval, the money back guarantee will be void.

All ground and aerial applications will be paid for by the Grower as per arranged terms of trade.

### **Communication:**

- Avomax will contact Grower no less than 12 hours prior to spraying.
- Avomax will contact neighbours (as notified by the Grower to Avomax) no less than 12 hours prior to spraying.

### **Spray Diary:**

Avomax will enter all sprays into the AIC electronic spray diary, which have been applied or arranged by Avomax, to the Grower's orchard.

### **Cost**

The Grower shall pay Avomax an annual spray management fee of \$400 plus GST.

This will be payable upon the signing of this agreement.

The Grower acknowledges that this fee is only to cover for the spray management and does not include the supply or application of any spray, or the pest monitoring fee.

**Money Back Guarantee**

Avomax guarantees that if more than 14% of the Grower's rejects, as indicated by the packhouse reject analysis for the full harvest season, is caused by leafroller or thrip damage, then Avomax will promptly refund the \$400 plus GST spray management fee.

Before making that refund, Avomax will need to sight a copy of the reject analysis and be satisfied that the analysis is only of fruit from the contracted orchard.
